DETAILED ACTION

Claim Rejections - 35 U.S.C. § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 6, 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Doverspike(6,097,696) in view of Hemmady(5,398,236).

With regards to claims 6, 8, Doverspike teaches a method of failure notification, the method comprising:

providing a communications network having at least two overlapping areas of nodes interconnected by communications links(Fig. 2, subnets), upon a failure event involving on of the communication links, broadcasting a failure message identifying the failed link, the broadcast being confined within the areas which include the failed link(col. 1 lines 54-56, flooding within the subnet). What Dovespike fails to teach is wherein broadcasting includes detecting the link failure at one or both of the nodes connected to the failed link. That is although Doverspike teaches detection, he fails to say where the detection is performed. Hemmady teaches a system where each node is capable of detecting faults in links between nodes(Fig. 1@18). Hence it would have been obvious to one of ordinary skill in the art to combine this feature with the nodes

in Doverspike for the purpose of detecting a fault at the nodes connected to the failed link and flooding subnets where the failure occurs. The motivation being to easily identify nodes connected to the failed link.

Allowable Subject Matter

3. Claims 1-5, 18-29 allowed.
4. Claims 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth Vanderpuye whose telephone number is (703) 308-7828. The examiner can normally be reached on M-F from 6:30am to 4:00pm.
